CAREER OBJECTIVE

Ambitious, problem-solving-oriented Computer Science and Engineering student with hands-on experience in full-stack development using React.js, Next.js, Node.js, Express.js, and MongoDB. Passionate about building scalable, user-focused applications and continuously exploring modern software engineering practices. A fast learner who enjoys solving challenging problems and turning ideas into practical, real world solutions.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript, HTML5, CSS3, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Role-Based Access Control

Database & Payments: MongoDB, Mongoose, MySQL, Stripe

Tools & Concepts: Git, GitHub, Vercel, OAuth 2.0, CRUD, API Integration, Agile/Scrum Basics

Interpersonal: Problem Solving, Research, Technical Writing, Team Collaboration

PROJECTS

Pawsitive — Pet Adoption Platform | Next.js, React, Express.js, MongoDB, Tailwind CSS

A full-stack platform connecting people with pets in need of adoption through searchable listings, adoption requests, and owner dashboards.

- Implemented JWT authentication and Google OAuth with protected routes for secure access.
- Built pet search and filtering with wishlist management and an adoption-request workflow.
- Developed owner dashboards for managing pet listings and adoption requests with a responsive, mobile-first UI.
- Deployed frontend and backend on Vercel with MongoDB Atlas for persistent data storage.

LifeShare — Blood Donation Platform | Next.js, Express.js, MongoDB, Stripe

A blood donation platform connecting donors and recipients across Bangladesh with role-based dashboards, donor search, and donation requests.

- Implemented JWT authentication, bcrypt password hashing, and Admin/Donor/Volunteer role permissions.
- Built CRUD operations and protected dashboards for managing donation requests.
- Added donor search with Bangladesh district/upazila filters for faster matching.
- Integrated Stripe for funding and deployed the frontend and backend on Vercel.

EDUCATION

B.Sc. in Computer Science and Engineering — United International University (UIU), Dhaka

Final Year, 1 Trimester Remaining

AWARDS & ACHIEVEMENTS

- **Global Nominee** — NASA Space Apps Challenge
- **Finalist** — Hult Prize
- **Final Year Design Project:** Perception of AI-Generated Uncertainty in Neurodivergent Users leading a 3-phase study (qualitative interviews, prototype development, practitioner toolkit) applying WCAG 2.1 AA, GDPR, and ACM Ethics standards.

LANGUAGES

Bangla — Native | **English** — Professional Working Proficiency
