

ROHAN JABED

Full Stack Web Developer | Problem Solver | AI/ML Enthusiast

Khilkhet purbo Namapara,Dhaka-1229 | rohanjabed001@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Final-year Computer Science and Engineering student with hands-on experience building and deploying full-stack web applications using React, Next.js, Node.js, Express.js, and MongoDB. Strong foundation in REST APIs, authentication, role-based access control, responsive UI development, and modern web application architecture. Interested in AI/ML and currently conducting a final-year research project on how neurodivergent users perceive uncertainty in AI-generated information. Global Nominee at the NASA Space Apps Challenge and Hult Prize Finalist, seeking a software engineering internship.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript, HTML5, CSS3, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Role-Based Access Control

Database & Payments: MongoDB, Mongoose, MySQL, Stripe

Tools & Concepts: Git, GitHub, Vercel, OAuth 2.0, CRUD, API Integration, Agile/Scrum Basics

Other: C, C++, Problem Solving, Research, Technical Writing, Team Collaboration

SELECTED PROJECTS

[Pawsitive — Pet Adoption Platform](#) | *MERN / Next.js • Full Stack*

- Built a full-stack pet adoption platform with Next.js, Tailwind CSS, Express.js, MongoDB, JWT authentication, and Google OAuth.
- Implemented pet search/filtering, adoption requests, owner dashboards, wishlist management, protected routes, and responsive UI.
- Deployed both frontend and backend on Vercel; integrated MongoDB Atlas for persistent data management.

[LifeShare — Blood Donation Platform](#) | *Next.js • Express.js • MongoDB • Stripe*

- Developed a donation platform connecting blood donors and recipients with registration, donation requests, donor search, and role-based dashboards.
- Implemented JWT authentication, bcrypt password hashing, admin/volunteer permissions, CRUD operations, and Stripe payment integration.
- Built Bangladesh district/upazila filtering and responsive dashboards; deployed frontend and backend on Vercel.

[SkillSphere — Online Learning Platform](#) | *Next.js • React • MongoDB • Tailwind CSS*

- Built a responsive course platform with authentication, protected routes, dynamic course details, API data fetching, and middleware-based route protection.
- Used Next.js App Router, MongoDB, Better Auth, Tailwind CSS, and reusable React components.

FINAL YEAR DESIGN PROJECT

Perception of AI-Generated Uncertainty in Neurodivergent Users | *United International University • Team of 5*

- Conducting a three-phase study involving qualitative interviews, prototype development, and a practitioner toolkit to investigate how neurodivergent users perceive and evaluate uncertain or hallucinated information from LLM-based AI tools.
- Applied accessibility and ethical considerations including WCAG 2.1 AA, GDPR, and ACM Ethics to the research methodology and prototype design.

EDUCATION

United International University (UIU), Dhaka | *B.Sc. in Computer Science and Engineering*

Final year • 1 trimester remaining

Milestone College | *Higher Secondary Certificate (HSC) • GPA: 5.00/5.00*

Kurmitola High School and College | *Secondary School Certificate (SSC) • GPA: 4.83/5.00*

AWARDS & ACHIEVEMENTS

- Global Nominee — NASA Space Apps Challenge
- Finalist — Hult Prize
